Unisex Lightweight Loopback Terry Hooded Pullover

Independent Trading Introduces the SS1000 Series...The Icon Loopback Terry Collection.

Tell us about the Loopback Terry Collection.

The Icon Loopback Terry collection is a culmination of multiple ideas we've been working on. Once we had the specialty terry fabric developed, we really wanted to give this garment a premium look. We think the color palette and the attention to detail sets this garment apart. It has all the features a traditional blank doesn't have.

What are the details of this fabric?

The SS1000 features a 7.5oz. (250 gm) 55% Cotton 45% Polyester Loopback Terry fabric.

As an artist and designer, what do you like most about the SS1000?

Our favorite thing about the SS1000 Collection is the color palette. We took our time to find the right colors and create a color palette that is true to our most popular colors with a modern twist. The colors are slightly lighter, and have a washed look to them that sort of mimics a garment dye. Other details like the raglan sleeves, Antique silver trims, and heavy shoe string drawcord, tie it all together.

Has there been a big demand for a Loopback Terry?

Most definitely. A lot of brands that we work with have been wanting a new Terry option for a few years now. We have noticed a Terry fabric trend where it is considered as a more premium and thoughtfully designed fabric with a unique visual interest that photographs well that isn't available with a traditional brushed back fleece.

What has the feedback been from customers so far?

It's been really positive so far. People like the new Loopback terry fabric, the color palette, and the added details like the raglan sleeve, and antique silver drawcord tips. Not to mention the price is very good.

How did the Double Drawcord come to be?

I think we did it first on our PRM65DRS Special Blend Dress. We couldn't decide between a matching or white drawcord, so we went with both! Once we offered a double drawcord option everyone really liked it, so we now offer it on our PRM90HT & PRM90HTZ garments as well. It gives the printer, designer, and end customer more options... "Ditch the one you don't like, or rock both."
